PROFESSIONAL PROFILE

Registered Nurse (BSN) with 3+ years of critical care experience in the Medical-Surgical and Trauma Neuro ICUs at Mercy St. Louis and a certificate in Applied AI and Data Science from MIT. Experienced Epic user (documentation, eMAR) who has trained peers on the system, and comfortable interpreting high-volume patient data streams. Built a deep learning malaria-detection model (97.38% recall on infected cells). Seeking healthcare data analytics or clinical informatics roles that combine bedside insight with technical skills.

TECHNICAL CORE COMPETENCIES

- **Healthcare IT & Systems:** Epic (clinical documentation, eMAR), MyChart; monitoring high-volume ventilator and hemodynamic data
- **Machine Learning:** Convolutional neural networks, transfer learning (VGG16), data augmentation, batch normalization; model evaluation (accuracy, recall, confusion matrices)
- **Programming & Data:** Python (TensorFlow/Keras, scikit-learn, pandas, NumPy, Matplotlib, Seaborn, OpenCV); SQL (foundational); HTML/CSS/JavaScript
- **Tools:** VS Code, Google Colab, Jupyter Notebooks, Git/GitHub, GitHub Pages
- **AI-Assisted Development:** Claude, Gemini, NotebookLM

PROFESSIONAL DEVELOPMENT & CERTIFICATIONS

Applied AI and Data Science Certificate — Massachusetts Institute of Technology (MIT) Oct 2026

- 15-week program covering machine learning, deep learning, and AI-powered solutions for operational problems; 16 Continuing Education Units (CEUs).
- **Capstone:** Built, trained, and evaluated five convolutional neural network models (including VGG16 transfer learning) to detect malaria in blood-cell images; recommended model achieved 97.38% recall on infected cells with about 40% fewer parameters than the top-scoring model. Project: dbrownrn.github.io
- Coursework in multi-agent AI systems and ethical data governance.

Registered Nurse (RN), State of Missouri Active through 04/30/2027

TECHNICAL & CLINICAL EXPERIENCE

MERCY HOSPITAL St. Louis, MO
Clinical Preceptor / Registered Nurse – MSICU/TNICU Oct 2022 – Dec 2025

- Provided critical care across four MSICU and Trauma Neuro ICU units (13–15 beds each) at a Level I trauma center, caring for a wide range of critically ill and injured patients; floated to other hospital units as needed.
- Delivered CRRT with 1:1 nursing care, including hourly fluid-balance checks; certified in CRRT and TNCC.
- Monitored and interpreted continuous ventilator and hemodynamic data and titrated high-alert infusions through Epic eMAR.
- Precepted 9 new RNs through a structured 12-week orientation aligned with institutional quality metrics.
- Taught new nurses Epic documentation tools and workflows.

BJC HEALTHCARE (BARNES WEST MEDICAL CONSULTANTS) St. Louis, MO

Medical Assistant (CCMA) Apr 2019 – Nov 2020

- Coordinated patient scheduling and flow for a multi-provider practice (3+ physicians); part of the first group to adopt workflow changes introduced by a new practice manager.
- Obtained prior authorizations from insurance payers for time-sensitive care, supporting continuity of care.
- Managed patient communication through the MyChart portal and electronic messaging systems.
- During the hospital's Epic go-live week, provided peer-to-peer support to the cardiac unit at Barnes-Jewish West County Hospital, answering staff questions and training them on EKG documentation and its flow into the eMAR.

EDUCATION

Bachelor of Science in Nursing (BSN), Accelerated Program Dec 2021

Barnes-Jewish College Goldfarb School of Nursing, St. Louis, MO | Graduated Cum Laude

Bachelor of Arts in Biology May 2018

Westminster College, Fulton, MO | 3.72 GPA, Cum Laude, Honors College coursework

- **Field study of invertebrates at a private reserve (Fulton, MO):** trapped and identified specimens, built spreadsheets and plots to track trends, and wrote a research paper on mimicry between two beetle species.
- **Team experiment on essential oils and neurocognitive performance:** co-designed the test, collected and organized the data, and presented at Westminster's research conference.
